## Professional Experience

### Rojrz Tech

Web Developer

📍 Karachi, Pakistan

Jan 2024 - Present

Wordpress Elementor HTML CSS JS Flutter Theme Customization

Plugin Customization

- Worked extensively on front-end development and WordPress customization in an onsite role, ensuring seamless user experiences and responsive designs.
- Collaborated closely with designers, developers, and stakeholders to align project goals, enhance functionality, and deliver high-quality solutions.
- Actively contributed to troubleshooting, optimizing performance, and implementing innovative features to improve overall project efficiency and user satisfaction.

## Some Projects

### Kanz-UI-Quran

🔗 [Github](#)

Dart Flutter

- A full-fledged Quran Reading and Listening Application built with Dart and Flutter. It offers the live date from the Islamic Calendar, allows users to read the Quran by Surah or Juz with Urdu and English translations, and listen to the Quran in the voice of your favorite Qaris.

### Spotify Clone

🔗 [Github](#)

Dart Flutter Firebase

- A fully functional Spotify Clone built using Dart and Flutter. It features Firebase Authentication for user Sign Up and Login, allowing users to stream songs, mark tracks as favorites, and enjoy seamless music playback anytime.

### CurrenSee Converter

🔗 [Github](#)

Dart Flutter Firebase

- A real-time Currency Converter Application built with Dart and Flutter, featuring Firebase Authentication for secure Sign Up and Login, live exchange rates via API, and automatic history saving of all conversions performed by the user.

### Eyetrone Eyewear

🔗 [Live](#)

Wordpress Elementor Contact Form 7 Theme Customization Plugin Customization

- A sleek and modern Online Glasses Store developed using WordPress, Elementor, WooCommerce, and Theme Customization. It offers a seamless shopping experience with product filtering, secure checkout, and user-friendly design tailored for eyewear eCommerce.

### Vroom

🔗 [Live](#)

Html Css Javascript Bootstrap

- A fully responsive Online Taxi Booking Website named "Vroom," built using HTML, CSS, and JavaScript. It features a clean user interface, interactive booking forms, ride-type selection, real-time fare estimates, and smooth transitions — offering a complete front-end experience for seamless cab reservations.
